RE: College Works Painters

Doing business with CWP means you are dependent on the local manager who hires and monitors the teams that paint in your area. You are therefore reliant on their skill or lack of, to perform the task to your satisfaction. It is advisable that you request experienced painters who know how to operate spray equipment, mask a house appropriately, and respect your property.

While we had issues with the original team and their lack of skill, subsequent painters who relieved the first team did a better job and finally we ended up with a very conscientious fellow who understood exactly what needed to be done and worked very hard to complete the job.

In the end, the job was completed with satisfactory results after many spills and oversprays were cleaned up by the area manager, Jimmy Beach. Jimmy made sure the job was satisfactory to us and continued to touch up errors made by the original team without complaint. Were it not for his dedication to satisfy us, we would never have hoped for the satisfaction of a job well done. Jimmy made it happen.
