The painting project you have completed today on my residence has certainly improved the street view appearance. The workmanship of your assembled crew and your supervision was exceptional, while meeting my perhaps rather stringent expectations.

Ben Giesbrecht  
College Works Painting

Dear Ben;

The painting project you have completed today on my residence has certainly improved the street view appearance. The workmanship of your assembled crew and your supervision was exceptional, while meeting my perhaps rather stringent expectations.

The power wash preparation for the painting returned the original sparkle to the anodized color of the Leaf Guard gutters and downspouts and the color coat stucco siding, this together with your commitment to draping and taping them prevented the trim paint color being applied to those surfaces. Most importantly the combined efforts did not produce any overspray, splatters or spills of paint upon the pave stone driveway, patio and sidewalks, or upon the vertical stone surface of the fireplace and the gated stone wall entry to the side yard that abuts the residence.

You have earned my confidence with your management of a commendable service and I very much appreciate the final product. Our home now has a neater and cleaner appearance. Thank you! Please feel free to have potential customers make contact with me if they have reason for additional inquiry about your College Works Painting services. Have a good summer!

Sincerely,

Dale L. Wierman
