John Johnson met with me to evaluate the needs of my house regarding exterior painting and cleaning, educating me about several issues. The house siding had aged paint that was beginning to show areas of mold growth which threatened the underlying siding.

Re: John Johnson and College Works Painting

John Johnson met with me to evaluate the needs of my house regarding exterior painting and cleaning, educating me about several issues. The house siding had aged paint that was beginning to show areas of mold growth which threatened the underlying siding. John was able to select the proper mold killing wash for the entire house which was followed by 2 coats of high quality paint. Remarkably, the cost was equivalent to other painting estimates that did not include washing off of the mold nor a second full coat of paint.

The job was done in the time frame quoted. John personally oversaw the painters, arriving each morning and evening to check on the progress and to personally touch up areas he felt needed a bit more attention. On the final walk through, a couple small areas were found that needed additional sanding and painting. John did these the next morning as promised. The house looks great. There was never a doubt that job was going to be done to a level that would exceed my expectations.

I highly recommend this fine young man and his painting crew.
