Well I suppose every year there has to be one house that doesn't want to be painted.  
Little  
did I know that it would be our smooth cedar sided house.

Dear Ryan,

Well I suppose every year there has to be one house that doesn't want to be painted.  
Little  
did I know that it would be our smooth cedar sided house. A good portion of the siding  
was reversed some years ago and left exposed to the elements. The original color  
painted  
over 30 years ago was a red based latex mixed with the reversed sidings that had turned  
anywhere from a rustic brown to a down right disgusting black due to the mildew that  
had formed on in the grooved siding.

Your guys Ryan and Pat did a great job making the paint look as even as possible and in  
some areas they had to apply as many as 4 coats to get the paint to seal those reversed  
sidings. It turned out to be quite a challenge, but rewarding to us at the completion of the  
job.

Good luck in your future in school.

Ric & Lyn Hero
