I wanted to tell you how happy I am with you company and employees. I was worried that with the state of my house to begin with, that it would not have turned out as nicely as it did. But am very pleased.

College Works Painting,

I wanted to tell you how happy I am with you company and employees. I was worried that with the state of my house to begin with, that it would not have turned out as nicely as it did. But am very pleased.

Being able to have them come earlier than expected was a wonderful surprise. I also had to do some traveling when they started and Dave called me every night to let me know what they had done each day, how it went, and what they expected to accomplish the next day. They were in and out in less times than they estimated as well.

I was happy with Dave and his team of Weston and Jacob. Their appearance and their job showed that they also cared about the job that they were doing. When I arrived back from traveling they were at my house and more than willing to help me get back into my house through all the masking, There were a couple of spots that they fixed for me without any question to make sure that I was satisfied, I appreciated the walk around to show me all the extra touches they did to make sure that I was happy with the job and to let me know how important it is to them to have done a job well done.

Thanks,
Chelsea Cannon
